

The Department for Child Protection Kinship Care Program Learning and Development

The Impact of Alcohol and Other Drugs on Families and Children

Parental substance use is a common child protection concern that can lead to removal of children of any age. We are here to share with you how substance use impacts upon families, and children so, together, we can better understand our children's needs.

The Department for Child Protection (DCP) is committed to working in partnership with you to make sure you have the information and support you need.

This learning and development module includes:

- Facts and information about the impact of substance use on family functioning and child safety
- How children's development is impacted by substance use during pregnancy and throughout the early years
- Tips and strategies for responding to children's needs who may display confusing or challenging behaviour as a result of alcohol or other drug exposure.

.....
This session will run for approximately 3 hours
with a short break. Catering is provided.

We are looking forward to spending some time with you
and helping you navigate your kinship care journey.

BENEFITS

Meet with like-minded people who are also providing care for children and young people affected by parental substance use

Hear from a subject matter expert who can offer information, understanding and support

Begin to feel more confident in responding to the needs of children and young people with complex needs
